Made of a hard ferrite magnet with a coloured plastic coating, our magnets are not only functional but also visually appealing. Please note that the holding power of these magnets is slightly lower compared to our neodymium magnets.

Our classic office magnets are available in various sizes and colours and are perfect as organisation magnets, fridge magnets or blackboard magnets. Whether organising documents, attaching notes to the fridge or capturing ideas on the whiteboard, our versatile round office magnets are the perfect companions for everyday office use.

PRODUCT NOTE:

The following colours are also available: brown, grey, light blue, pink, turquoise, violet.

The NdFeB magnets below diameter 25 do not have a plastic ring on the adhesive surface.

As an alternative to the standard, we also offer individual solutions:

" Plastic housing in special colours

" Individually printable

* The forces have been determined at room temperature on a polished plate made of steel (S235JR according to DIN 10 025) with a thickness of 10 mm (1kg~10N). A deviation of up to -10% from the specified value is possible in exceptional cases. In general, the value is exceeded. The type of application (installation situation, temperatures, counter anchors, etc.) sometimes influence the forces enormously. The values given are for orientation purposes. Let our experts advise you.
